Newark, N. J., from the returns received, will show a population of over 60,000 now, against 38,894

The New York papers announce the approaching nuptials of Mayor Wood and Miss Georgianna Crean, sister of Mrs. James Gordon Bennett.

The Bible has been translated into 200 languages and dialects, and is ready for 600,000,000 of the inhabitants of the earth; but only 100,000,000 have as yet received it.

MILLINERS -Do the admirers of pretty milliners know why they are called so? Not one in a million. The name comes from Milan, the city from which Milan-ary goods were first imported into England. REVIVAL OF THE SLAVE TRADE.—The New York Evening Post publishes the names of eighty-five slavers, fitted out at New York during the three and a half years of the administration of James Buchanan. WORTH TRYING .- Coal oil is said to be a sure destroyer of bugs. Apply plentifully with a small brush or feather to the places where they most do congregate. The cure is effectual and permanent.

The Great Eastern steamship has six masts; three of them are iron and hellow, perforated with holes, like a flute, and are made steam pipes for the ship. They have their names painted on them as follows :- tri-sail mast, fore mast, main mast, aft mast, mizzen mast and jigger mast.

PRINCES. - Among the recent graduates from West Point was a son of Commodore Vanderbilt. It is said, the father promised the youth \$100,000 if he would bring himself among the first five, or \$50,000 if he completed the course with honor. The son was | the two countries. not the winner of the former but received a check for

\$20,000; 63 rioters were arrested, and fined only \$5 | the language of the Premier. each by the Recorder. Very few people have an idea of the immense

total value of these amounts is some \$13,000,000.

Argus office. He entered a Catholic college in Ohio soon after he became of age, and has now been a bishop for six years. Printers can be made into anything." A correspondent writing from Louisiana, says that he recently saw a fight between a large rattlesnake and a hog, which was interesting. The latter kept his bristles so extended that the attempts of the snake to bite him were foiled; until, watching his chance,

he suddenly rushed upon the reptile, seized it by the neck, and placing his forefeet on its body, tore it in two, and then leisurely devoured it. Cuba is advancing in population and all other sources of wealth. It is calculated that the present population of the island is 1,160,000, of which nearly 550,600 are white inhabitants, 180,000 free colored, 400,000 slaves, and 38,000 Asiatics and Indians. The sugar estates are immensely productive. Twen-Jy-three of the principal plantations, comprising about one hundred thousand acres of land and 10,165 slaves, besides buildings, machinery, &c., are valued

at nearly \$15,000,000. Syria .- The New York Journal of Commerce is anxious for foreign intervention to stop the Syrian res, and closes an article on the subject thus : "O, if Oliver Cromwell were Protector of England at this time, would there not be such a stir in Constantinople as that city has not seen for three centuries! An English fleet would have passed the Dardanelles and entered the Golden Horn before now. And Abdel Medjid would soon see the walls of his Seraglio knocked to atoms by British cannon, if he did not do better."

Coolies in Perc. - There are 20,000 Chinese slaves now in Peru, and the demand continues. A cargo of these coolies was landed in May, and they sold for \$400 each-the term of servitude being eight years, the wages four dollars a month, two suits of clothes in a year, and two pounds of rice per day. It costs the trader about \$35 to land a Chinaman on the Peruvian coast, and as he is pretty certain of getting \$300 or \$400 for him, the profits are enormous, although the deaths on the passage from China are often large. The bark Napoleon lost by deaths, over half of the number taken from China.

SHOES BY MACHINERY .- The present method of shoe-manufacturing is rapidly becoming old-fashion-ed. There is a steam shoe factory in Saxton's River, Vermont, where all the hand labor used about a shoe is in lasting on the uppers. The soles are cut, rolled, leveled and then shaped by machinery. They are blacked, polished and pegged by machinery. They are also bound, stitched, punched and sandpapered by machinery. The establishment contains room for four hundred hands, none of whom require any of the old familiar tools or the shoe bench.

New Kink in Whaling .- The whale ship Benjamin Morgan, owned in New London by Messrs. Lawrence & Co., last week took a load at New York for Cape Town, at the Cape of Good Hope, consisting principally of lumber, there being something like 23,000 feet on board, with thirty tons of tobacco, several cases of agricultural implements, chairs, and a large quantity of salted provisions. She is going out to bring home the oil secured by the ships of her owner at Hurds and Desolation islands, and instead of sending her out in ballast, they have freighted the ship as far as the Cape, where she will discharge and proceed to the islands, ship the oil, and then return home. She has no try-works built, and carries only two beats, and will be sailed by only an ordinary number of men, instead of the usual whaling crew. Among the ships from which she will receive her home freight, is the Isaac Hicks, and her tender, the schooner Pacific, bark Dove, schooner Colgate, schooner Cornelin, and the schooner Sawyer, tender to the bark Alert, now on her way to Hurds island.

MOST SINCULAR CASE OF SNAKE CHARMING .- The Rochester Union relates the case of a child two years of age, daughter of Mr. Davis in that city, charmed by a snake. One day Mrs. Davis found the snake in the arms of the little girl, who was fondling it as she would a kitten. The mother was naturally much alarmed by the apparent peril in which she saw her child, and seized a stick to destroy the reptile. The snake slowly retreated, showed its tongue, and hissed at the mother. The child cried, and begged so hard of its parent to desist, that she allowed the snake to retreat to its hiding place. It soon became apparent that the little girl thought of little less but her companion, the snake, and would return to the yard in search of it as often as she was allowed to do so. Under the fascination of this reptile, the child-a very pretty little girl-has begun to decline, and now weighs but eighteen pounds. Respectable physicians were consulted, it is said, and advised that no violence should be used toward the snake, as it might prove fatal to the child. How many meetings the snake and child had we are not positively informed; but we infer that they have been frequent. When they meet they rush to each other with all the apparent emotions of friendship and attachment that can exist between two living beings. Only yesterday, Mrs. Davis came to this city with the little girl, and when she returned, the party left in charge of the house informed her that the snake had been more bold than usual, and had actually been upon the steps leading to the door, awaiting the appearance of the

A BRILLIANT METEOR .- The 20th of July will long be memorable for the splendid celestial phenomenon which appeared in the heavens and was for a few moments the observed of all observers over a country at least a thousand miles in extent. From the interior of Pennsylvania as far east as Boston, as far north as Troy, New York, and as far west as Lake Erie, it illuminated the whole sky, and is represented as presenting the same general appearance. It is thus described is: At about a quarter before ten o'clock the atmosphere being very suitry, and no priests themselves, counting of beads on a rosary, in the west, from which a blue-tinted, luminous globe prostrations, and processions, and burning of tapers shot out, which at the first glance suggested to the spectators the idea of an artificial fire-work. Instantly it lost its globular form, bursting, like an immense skyrocket, into four portions. The first two are represented as resembling brilliant illuminated chand-eliers, with innumerable jets of purple flame; the others were globular and comparatively small, appearing rather as the tails of the first. They maintained their relative distances as they flew athwart the sky from west to east, occupying in their flight something like a minute. About a minute after their passage a detonation was neard, as from a piece of ordinance; but whether it proceeded from the bursting of the meteor is a matter of conjecture. One very curious optical illusion which it gave rise to is worthy of remark. To the spectators it appeared to be no almost directly over their heads; and yet, when the gain personal influence, remove prejudices, and prefact is considered that it was witnessed under almost identical circumstances over a very large extent of country, it will be perceived that the idea of its insignificant elevation was most delusive. It must have been at an immense elevation, certainly not less than forty or fifty miles, to have been seen at these widely remote points, and to have presented at all of them the same appearance of being so nearly in the zenith.

European.

Her Royal Highness the Princess Frederick William of Prussia, Victoria's daughter, has just been safely delivered of a daughter; baby No. 2. Her Royal Highness and the Royal Infant are both doing well. FREE SIGHY.-Garibaldi's conquest of Sicily is complete. The Neapolitan troops, by order of Francis II .- who bases this unexpected action on humane grounds-have evacuated Messina and Syracuse, eaving the Sicilians masters of themselves and their island home. Thus, in scarce a month from the time Garibaldi with his few volunteers landed in

sicily, it is free. ARTIFICIAL MAN .- The Memorial Bordeauz says false teeth, a nose of silver, covered with a substance imitating flesh, and a silver plate replacing part of his skull. He was a soldier under Napoleon, and here are his trophies.

MARRIAGE AND THE SABBATH .- In London-the netropolis of a comparatively Sabbath-keeping kingdom-the illegitimate births in a given period were our per cent, of the whole number; while in the Subbath-desecrating cities of the continent they were n Milan, 32; in Paris, 33; in Brussels, 35; in Munich, 48; and in Vienna, 51. Thus demonstrating by fact and history the intimate connection of the rices reproduted in the Decalogue, and teaching with dreadful emphasis the peril of desecrating the Lord's

FRENCH ATLANTIC TELGRAPH.—A French company have just proposed—as we learn from the Courrier des Etats-Unis-at their own risk and peril, without subvention or aid from any government, to establish a submarine line between France and the United States; demanding, however, in case of success, that the French Government should guaranty them an annual income of \$210,000, and the exclusive privilege of telegraphing between France and the United States, during a period of fifty years; and obligating themselves to lay additional cables in case one should prove insufficient for the telegraph business between

GREAT BRITAIN. - The greatest interest is felt in the in all its branches, and in greater variety than can be found remarkable speech of Lord Palmerston on the national ABOUT RIGHT .- About thirty notorious houses of defenses, which had caused a fall of the funds at ill-fame, dance houses, groggeries, &c., in the south- Paris, and provoked strong expressions of dissatisfacern part of St. Louis, were riddled by a mob, and all then from Mr. Bright and Mr. Osborne, the latter the furniture and effects burned in the street. The of whom declared that cordial relations between lose by the destruction of furniture is estimated at | France and England had been made impossible by

FOURTH OF JULY IN LONDON .- At the Fourth of July banquet given in London by the American Lead, Tin & Copper, Hip Baths, Russia, Galquantity of burning fluid and camphene consumed in | Association of that city, Mr. Dallas, in responding to | vanized and English Sheet Iron, Lead Pipe. the United States annually. The amount of the the toast of "The day we celebrate," incidently reformer is estimated by competent persons at 24,000,- ferred to the operations of Garibaldi in the following kinds of goods usually kept in his business, all of which he the medium of Life to the Body; and it is, we know, the great 000 gallons, of the latter at 6,000,000 gallons. The terms :- "At this moment, in a somewhat distant will sell extremely low for cash, or approved credit. Seeder of every part of the frame. Thus the blood is the great Island, a spontaneous and voluntary insurrection | Tin Ware of every description made of the best materials, and | channel of disease; consequently, a good or bad state of the A PRINTER'S RISE -The Roman Catholic Bishop | against oppression, cruelty, and wrong has awakened | Job Work executed in the most workmanlike manner. of Pennsylvania recently visited Portland, Maine, a wide spread sympathy. He forbore making a sinand in noticing his visit, the Bangor Whig says: gle comment upon that movement; but if there was an all kinds of Lead work done, both for vessels and houses.

Among the stock of Cook Stoves, he would call particular at-"Thirty years ago, he was an apprentice in the found among the champions of Sicily's rights and liberties a wise, disinterested, just and brave deliverer, who connected the heroism of the present hour with the heroism they were commemorating, that man was Garibaldi." Tremendous applause, and three cheers for Garibaldi followed these remarks.

ANOTHER ARCTIC EXPEDITION.—Mr. Parker Snow proposes to leave England at the close of the present ear with a small vessel, on an expedition to the Arctic regions. Proceeding round Care Horn, he Honolula GRATIS. (227-3m-285) GEO. C. SIDERS. will pass through Bhering's Straits, and reach a point a little south of that attained by Captain McClintock. His object will be to find further traces, and to obtain more precise information concerning the fate of the crews of Sir John Franklin's vessels, the Erebus and Terror. Mr. Snow bears the honorable reputation of having predicted, with considerable accuracy, the locality in which the traces of the missing navigator would be found. It is expected Mr. S. will leave England during the fall, and start from Honolulu or Victoria early in the Spring.

LONDON TIMES OWNED BY THE ROTHSCHILDS .- It has recently been proven that the London Times is mainly owned by the Rothschilds, and the fact creates considerable sensation in London. The statement of Mr. John Walter, M. P., in Parliament, that he was not the principal owner, as well as the course taken by the Times for many years, proves and confirms it all. Not one single move on the political chess-board of Europe that would have any tendency to injure the ecurities of any nation that were large creditors of the house of Rothschilds, particularly Austria, but has been vehemently opposed by the Times.

FRANCE.-Panis, July 23.-The Monitour gives he Customs' returns for June and the first six months of the current year. The amount of import duties for June, 1860, is

11,968,682f.; for the corresponding month in 1859, it was 18,667,836f., and in 1858, 19,581,141f. The amount for the six mouths ending June, 1860, s 69,181,181f.; for six months, ending June, 1859, 5,206, 603f.; and for the corresponding period in 858, 93,389,317.

The quantity of wine exported has diminished. The exportation of spirits has also diminished. The value of the exportations in articles of luxury, odes, &c., has also diminished from 2,748,000f. to 2,450,000f.; and to England from 586,000f. to 451,000f. Silk tissues have fallen from 17,333 quin-

tals to 15,648. The returns of internal navigation show a decline of commercial activity. During the first six months of the past year there entered in French ports, from every source, 12,130 vessels, with 1,924,229 tonnage.

For the corresponding period of the present year 11,106 ships with a tonnage of 1,862,383. A FRENCH STEEL PLATED FRIGATE.-The Phare. le la Manche, published at Cherbourg, announces that the completion of the steel-plated frigate Norandie is being carried on with all possible dispatch.

The plating is 12 centimetres thick, and is impervious o common shot unless a ball should strike the same spot thirteen times; and on the thirteenth shot it be perforated. The Normandie is about to receive her masts, which are colossal. Fore and aft, appear grim-looking implements of wholesale death, n the shape of curved scythes, which, rendered noveable in every direction by steam, can cut the oughest vessel in two befere time has been given for round of shot to be fired. ITALY .- The Irish volunteers in the Pope's army are getting properly paid for their gratuitous hostility to

talian liberty. One of them, who has lately returned o Dublin, publishes a statement to the effect that the rish are treated in a most disrespectful, crucl and treacherous manner, by the Roman authorities. They are trampled on by the Government, hated and detested by the people of Italy. A company of 154 of them has recently been sent back to Ireland, the Pope's officers declaring they could do nothing with them, and the British Consul receives letters daily from members of the Irish brigade, begging for assistance to obtain their release.

Dates from Kanagawa are to July 25th. The Japanese steam Kandinmarrah had arrived after a passage of 18 days from Honolulu. From the Americans who came in her, we learned that the Japanese conducted themselves admirably on board, taking the position of the vessel daily by the sun, and brought her, in seamanlike manner, into this bay without accident. The appearance of the steamer, from America, with news from the Ambassadors, reated a great excitement both amongst the Amerans and Japanese. The foreigners were anxious to hear liew the Japanese had been received in America. and the Capanese were fearful lest the Ambassadors would not servive the great trip across the pond. However, all doubts were dispelled when the great mail was distributed. - Cor. Alta.

JAPANESE RELIGION .- A letter from Richard H. Dana, Jr., in Japan, gives an interesting account of the religion of that peculiar people :"The two great religious systems of Japan are Buddhism, an East India exotic, but the most influential, and the Sin Syn, the ancient national faith. These are said to exfoliate into thirty or more sects. The number of points presented has probably dissipated the electricity of theological controversy. They to not indulge in polemics, but agree in demanding the utter exclusion of Christianity. I saw none of those signs of decay and neglect about their temples which one so often meets with in China. The buildings are in good repair, the floors well matted, the the worshippers numerous, and the worship decent and grave. Neither here nor in China have the idolatries any traces of bloody or obscene rites. There is no instruction connected with public worship It consists in unbloody offerings, a chanting of a few words of almost unknown signification to the accompanied by dull beating of gongs, kneelings and and incense sticks. They have fasts and

for all ages, classes and purposes, which, I suspect, possess a strong hold on the people. "Missionaries, strictly speaking, there are none. Since the utter extermination of Christianity in blood and fire, in the seventeenth century, missionaries have been prehibited. By the late treaties, they allow foreigners to build churches and practice their worship within the limits assigned for their residence; but they tolerate no preaching or teaching to the natives, nor the circulation of religious books. The people at home must not delude themselves into the belief that any strictly missionary work is doing or can be done in Japan. No clergyman are of any service here but scholars and gentleman; men who can master the language and literature of Japan, get an insight into the genius of its institutions, pare the way for the future."

> LAND FOR SALE! THE UNDERSIGNED OFFERS FOR

Sale the Premises formerly occupied by P. Emmert, Esq., situate in Nuuann Valley, above the King's country scat.

There are four acres of fine land, with a good frame dwelling thereon, and the whole will be sold very low.

206-2m Inquire of H. HOLSTEIN.

Homolulu, Sept. 27, 1860.

THE GREAT EASTERN .- The Charleston Mercury proposes to the owners of the Great Eastern to go into the slave trade. "Ten thousand negroes at a trip-only think of it !" If the managers don't treat them better than they did the excursionists to Cape May, we fear, the cargo won't reach port in saleable condition.

Power of a minomity. -In case of the election of imation. The public are invited to amend. President by the House of Representives, the seventeen smallest S ates can elect a President. Three of these minor States have only a single representative, six have only two, three have three, three have four, one has five, and another six, so that thirty-seven members of Congress, being a majority of the delegathat near St. Sevier there lives an old soldier with a tions from a majority of the States, can elect a Presifalse leg, false arm, a glass eye, a complete set of dent, if no election is made by the electors chosen by the popular vote.
